EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with J. Butscher on May 22, 2006.

The application has been amended as follows:

In the claims:

Claim 1, line 3, after "plate;" insert "a channel formed through said ground plate;".

Claim 2, lines 1-2, delete "a channel formed through said ground plate, and".

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1-8 is the inclusion of the limitations of an self-cleaning ink jet print head that includes a ground plate formed through a ground plate; a makeup fluid supply that supplies makeup fluid directly to the ground plate through a makeup supply conduit, the makeup fluid formulated to remove ink residue from the channel as the makeup fluid flows through the channel. It is these limitations found in the claims, as they are claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for allowance of claims 9-15 is the inclusion of the limitations of an self-cleaning print head for an ink jet printer that includes a makeup fluid supply system that supplies makeup fluid directly to the ground plate through a makeup supply conduit during a cleaning cycle, the makeup fluid formulated to remove ink residue from the channel as the makeup fluid flows through the channel. It is this limitation found in the claims, as it is claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for allowance of claims 16-21 is the inclusion of a method steps of a print head for an ink jet printer that includes directly supplying makeup fluid to a ground plate in order to remove ink droplet residue from the ground plate. It is this method step found in the claim, as it is claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eremity et al. (US 6,575,556 B1) disclose a self cleaning print head having a solvent supply conduit for supplying solvent of the front face of the drop generator. Helgeson et al. (US 3,761,953) disclose an ink supply having a recirculation and replenishment system. Lovelady (US 3,596,276) disclose an ink jet printer having an catcher attached to the electrode plate. Yamazaki et al. (US 4,296,418) disclose an ink jet printer having a reverse solvent flushing means.

Art Unit: 2861

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
